Cassini Orbiter
will reach Saturn in
7 years

Mega Space Mission: All The Way To

SATURN

It will take 7 years to get there!!!

On October 15 last year the Cassini Orbiter 7 was launched. Its mission: To reach out and explore Saturn, the remotest planet of them all. In fact, it is so far away that Cassini will not reach Saturn until year 2004! How old will you be then?

Cassini is not only going to explore Saturn, but will send pictures back to Earth of everything up there via the Satellites. It will also launch a

special space probe, called Huyghens, and that will explore Titan, one of Saturn's mysterious 18 moons. The space scientists think that the research from Saturn, and Titan especially, may reveal how life started on our own planet, Earth!!!

Very exciting if they are right, eh? But just think: They will have to wait seven years before they will know...

Lift-off!

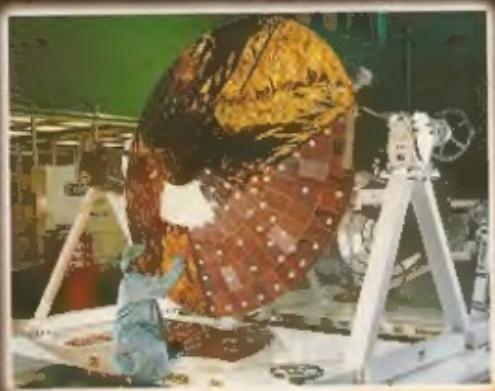

15 October 1997

This is what Cassini Orbiter looked like when it was taken to the space centre.

This is Huygens, the auxiliary space probe that will explore Titan, one of Saturn's 18 moons.

Facts:

The Cassini Mission is a joint venture between the American space experts from NASA and the European experts from ESA. It is mega expensive so they had better find something up there!!!

This is what it will look like when Cassini reaches Saturn and starts orbiting (i.e. circling around the planet) to explore everything.

NASA:

National Aeronautics & Space Administrations.

NASA is the space centre in the USA where all the American space activities are developed.

ESA:

European Space Agency.

ESA is the space centre in Europe where some of the European countries co-operate in developing space activities.

JPL

CASSINI RADAR

Cassini has very advanced technical equipment which enables it to send pictures back to earth.

Professor Webb

Navigator

Volt stone
Ordinary rocks on
Planet Aramara turn
to volt stones when
lightning strikes.
The energy loaded
rocks work as fuel
for the spacescrafs.

Watch out for the
giant insects

Planet Aramara!

Tough Captain Webb and his crew are assembled at the Arachno Base. The cool Corporal Steel, robot Techno Leon and scientist Captain Wizer are joined by clever Officer Haverrick and the sharp-shooter Navigator Sharp on their mission. A volt stone mission.

1

Find as many volt stones
as you can, so we can
power all our vehicles and
equipment!

Watch out [beep] for
the dangerous [beep]
insectoids!!

We'll keep our eyes
peeled.

Even though the insectoids
haven't been observed on the
surface for a very long time.

2

The radar is showing
volt stone activity.
Navigator Sharp!

Cool! We'll
land here then.

BRRRRRMHHHH

Uhuh... Do you
hear that?

Yes! Call base
at once!

Sonic Stinger calling Base! The Insectoids are attacking!

Tornation! I've lost radio contact!

They are in danger!

3

Space Swarm calling base! Mosquito Scout and Sonic Stinger have been located...

Don't worry, Captain! Techno Leon and I will sort things out!

- but I can't see Maverick or Sharp.

Corporal Steel finds the Mosquito Scout and the Sonic Stinger. But Maverick and Sharp have vanished.

5

4

Captain Webb doesn't hesitate. He despatches the robot and his best mini-Corporal Steel!

5

I (leep) will guard
(leep) the craft ...

I'll check the
nearest shor(l)

Yippee. Look at all
these volt stones! Wow.
talk about luck!

6

You're telling me! A
good thing we invaded
those Insectoids!

Hey! Check
that out!

Oh no! Steel is on
his way down into the
Insectoid nest!

7

Aargh! I've got
roaring Insectoids
on my tail!

9

Quick, we will have
to cut and run!

Ok! I will just shoot
them next time...

My circuits (long)
are seizing up
(leep) from fright!

Steel escapes
the Insectoid nest
just in time.

10

I guess we'll
return for the
volt stones
later ...?

RARE FINDS IN THE ANCIENT SPHINX!!!

Look, it's the
Sphinx!
The famous
Egyptian statue.

This must
be the secret
entrance....

I'll start
making supper.

I hope
the grave
robbers
haven't
got there
first.....

It's a
beauty!

I better
make sure it
is safe from
that arch
swindler,
Mr. Hates!

The giant
ruby!
I've found it
at last!

Strangers???
But they don't
look like grave
robbers....

Hates is
coming!

Hurry up,
Professor! Grab
my hand!

We've got
to make
ourselves
scarce.
Pronto!

They got away!
I bet they handed
over the ruby to the
police, the fools!

TAKE A WILD TRIP TO TECHNIC CITY!!

Hey
- do you
want to
play?

Log onto
our exclusive
website
for a great
CyberMaster
experience!

The LEGO TECHNIC CyberMaster set contains a CD-ROM, a transmitter, a programmable LEGO brick and four sensors, along with a range of LEGO bricks, gears, wheels, motors and other building elements.

You can design your own games like building a robot character called Crusher, which competes with a hand held insect named Stinger. Or you can build a number of different robotic vehicles.

EXPLORE INVENT MASTER

LEGO® MINDSTORMS® ROBOTICS INVENTION SYSTEM™
ENABLES KIDS NOT ONLY TO UNDERSTAND
TECHNOLOGY, BUT ALSO TO BECOME
CREATIVE MASTERS OF IT.
THIS HAPPENS WHEN THEY BUILD, PROGRAMME
AND ACTIVATE THEIR OWN INTELLIGENT
INVENTIONS.

BUILD

Knowledge is only part of understanding. Genuine understanding comes from hands-on experience.

Design and build robots that move, act and think on their own.

PROGRAMME

See your mind in motion by creating programmes that control the behavior of your inventions.

Use your PC to programme infinite combinations of behavior into your inventions.

ACTIVATE!

Once you have built and programmed your invention, test your ideas to see how they work in the real world.

MINDSTORMS

Go to www.LEGOMINDSTORMS.com to find out more about LEGO® MINDSTORMS products and experiences. If you own the LEGO MINDSTORMS Robotics Invention System you can become a member of the LEGO MINDSTORMS Robotics Network.

Find out more from the website on the benefits of being a member.

THE INCREDIBLE PNEUMATIC BREAKDOWN TRUCK !!!

The cool pneumatic breakdown truck is ready to help busses and other large vehicles that get into difficulty. Before we despatch the breakdown truck, we always check everything out down to the finest detail!

This is how you make the pneumatic system work:

1. Pump air into the tanks.
2. Move the lever up and down.
3. Now air will flow through the pipes to the pistons.
4. And you can also move the crane and dozer blade! COOL!

Building Contest

Build a Submarine For the Aquanauts!

The Aquanauts are given a new mission to search for the lost city of Atlantis. They need your help to build them a new, improved and speedy Submarine for this important mission.

Name your submarine and send in a photograph of yourself with your creation(s) to the following address by the 20th January 1989 to qualify for the contest.

LEGO Australia Pty Ltd
Building Contest
P O Box 4151
Lane Cove DC NSW
Sydney, Australia

Make sure you put your name, membership number, age and the name of your submarine on the back of the photograph. If your picture is featured in the next two issues of the LEGO World Club magazine, you will win one of these attractive LEGO prizes:

Terms and Conditions

1. Competition is only open to LEGO World Club members.
2. Participants must be under the age of 16.
3. Prizes for winners will be delivered 8 weeks after the photograph is featured.
4. The judge's decision is final and no correspondence will be entered into.
5. Prizes are not transferable or redeemable for cash.

Win great prizes!
